## HISTORY

The **University of Pernambuco (Universidade de Pernambuco - UPE)** has its origins in the Pernambuco Foundation for Higher Education (Fundação de Ensino Superior de Pernambuco - FESP) that had been funding a group of already existing State Institutions of Higher Education since 1965. In 1990, FESP was declared extinct and was replaced by the University of Pernambuco Foundation in accordance with State Law nº 10.518 of 29 November 1990. This Foundation was to sponsor the newly created University of Pernambuco, a public institution, recognized by the Ministerial Decree nº 964 of June 12, 1991.

Linked to the Secretariat of Science, Technology and Innovation of the State of Pernambuco (SECTI), the **UPE** today is part of the patrimony of Pernambuco society. Its mission is to contribute to the sustainable development of Pernambuco State through education, research and university extension.

The **UPE** is a public institution of higher education, present in all regions of the State. Its multicampi complex consists of three major teaching-hospitals, 15 school units spread across the area of Recife and the cities of Camaragibe, Nazaré da Mata, Palmares, Caruaru, Garanhuns, Arcoverde, Salgueiro, Serra Talhada and Petrolina.

In addition, the administrative headquarters (Reitoria), four elementary and secondary schools (Escola do Recife e Escolas de Aplicação) are also part of the university campus.

In order to establish academic, scientific and cultural cooperation, the **UPE** maintains cooperation agreements with universities and research institutes in the Americas, Europe, Asia and Africa, reaffirming the policy of expanding the international relations of the university.

The university aims to be fully recognized by government and by society at large for its contribution to the sustainable development of all the regions in which it is present, due to its excellence in teaching, research and university extension, thereby definitively assuming the character of a state, public and tax-free university.

The entire university community is made up of 995 faculty members, 5,258 employees, and 18,561 students: 13,417 undergraduate, 3,613 graduate (lato and stricto sensu), 1,251 distance education and 280 students in special programs.
